Retail therapy

Infinite 3D boast a prestigious client-base of international retailers and businesses, delivering computer generated visualisations and providing professional photography around the world for global brands such as Skechers, Ugg, Nike and Calvin Klein.

From illustrating an individual store, to successfully communicating an entire retail park, we have retail experience in the UK and abroad and understand the particular requirements and unique specifications of global businesses to uphold their brand values and corporate identity.

In addition to projects throughout the UK, Infinite 3D have completed commissions in destinations across Europe, including Madrid, Berlin, Vienna, Warsaw, Paris, Porto, Florence, and desti

We illustrate store and retail park designs for signing off the proposals by retailers, local planners, or land owners and also photograph completed shops, supermarkets and retail parks for estate portfolios, publicity and design awards.
