Work, rest and play...

Infinite 3D enjoy longstanding working relationships with many national and international leisure- brands, providing 3D visualisations and professional architectural photography to hoteliers, restauranteurs and leisure outlets.

With a varied portfolio of boutique hotels, global chains and unique facilities such as Surf Snowdonia, we have provided CGIs and architectural photography of projects for Accor, Dominos Pizza and McDonalds.

Our visualisations, representing fully-detailed 'lifelike' representations of proposed interiors are used by clients, such as Hilton, to sign-off a design prior to work on site. These images accurately represent the proposed design, materials, fixtures and fittings.

Professional photography for boutique hotels and international hotels provides owners and operators with a lavish suite of images to help promote locations and increase occupancy.
