Our Civic Duties.....

With a varied portfolio of architectural visualisation and professional photography of council offices, law courts, railway stations and churches, Infinite 3D's portfolio in this broad sector is as varied as it is prestigious.

Having modelled and animated the scheme design for new northern headquarters for the Welsh Assembly Government for Austin-Smith: Lord and Pochins, Infinite 3D were commissioned to photograph this scheme in Llandudno Junction and the new Aberystwyth office by the Welsh Assembly Government directly.

Through Muse developments we have photographed a host of iconic civic buildings, including Talbot Gateway council office in Blackpool, The Word in South Shields and CAST in Doncaster.

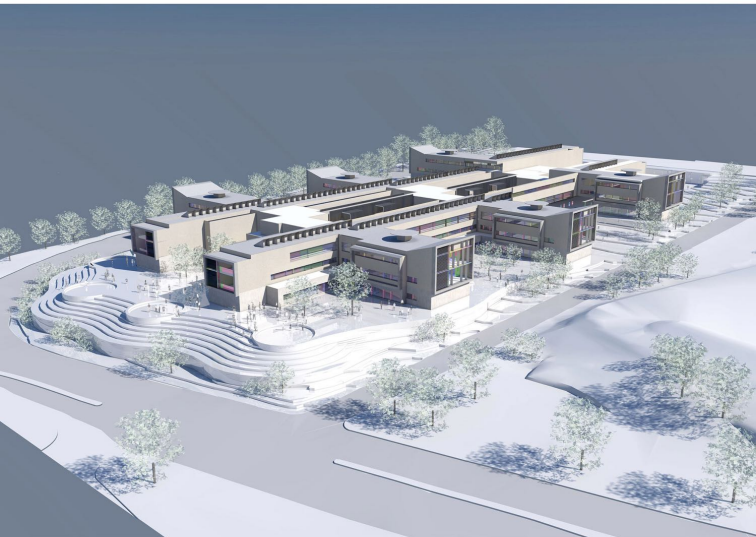

In 2015 we produced CG visualisations of proposed new law courts across Ireland to help BAM secure the €70 million commission to design, build, finance and maintain facilities at Cork, Drogheda, Limerick, Mullingar, Waterford and Wexford.

In both visualisation and photography Infinite 3D have a great working knowledge of transport and infrastructure. An understanding of the specific design requirements of complex realignment proposals helped with our animated presentation of the new Metrolink Trafford Line Extension, and we have both animated and photographed new railways stations at Westgate Westfield and Northampton for Buckingham Group Contracting and CJTC Architects.

Our transport work extends to include development and progress photography of new railway lines prior to commission, often shot with out 21m telescopic mast.
